FOREWORD

In previous forewords I suggested the study of p.iv where examples in the coding method are given. I suggested these examples be studied before reading the hypothetical questions and answers. In the interim I have discovered that many have grasped the method immediately and have assumed it is not necessary to read the questions and answers.

I am suggesting in this foreword the study of the questions and answers as soon as the general method of coding is understood. Some of these questions and answers are extremely important; others not of great importance; but none unimportant enough to brush over lightly.

The following tips properly belong with the two on p.xviii, but for convenience I am inserting them here: Don't memorize the abbreviations; they are nearly all obvious when the item in question is in hand. Don't get thrilled over items priced 2, 4, or even 6, unless you know just what you can do with them. These items are common enough that their supply generally exceeds their demand; or, if not common, have very little demand.

The Mrs. informs me that this pocket edition must also be dedicated to her--so it is.

Philip M. Roskie

Oakland, California
February 26, 1957

THE FOLLOWING ARE THE FIRST SIX ENTRIES IN THE BOOKMAN'S BIBLE:

- 1) 1850. Archbold, Ann. ~~A~~ Book For ~~The~~ Married And ~~The~~ Single.
192 pages, East Plainfield. \$31.
- 2) 1850. Allen, ~~Miss~~ A. Ten Years In Oregon.
(Second Edition). Ithaca. \$10.
- 3) 1850. Atwater, Caleb. ~~The~~ Indians Of ~~The~~ North-West.
Columbus. \$12.
- 4) 1850. Averill, Charles. Life In California.
Second Edition, Boston. wrappers. \$60.?
- 5) 1850. Adams, Josiah. Account Of Concord Fight, April 19, 1775.
24 pages. (no place given; no price given)
- 6) 1850. Abbey, James. California. ~~A~~ Trip Across ~~The~~ Plains.
wrappers, 64 pages, New Albany. \$545.

The underlined figures, letters, etc., are the keys to coding these items. Most of these figures, letters, etc., are of prime importance; the others are secondary and are used only to clarify. Taking each underlined figure, letter, etc., in the exact order of their appearance, the following results:

- 1) 1850 A A BFM&S 192p, EP.31
- 2) 1850 A A TYIOr (2dEd It.10
- 3) 1850 A C ION-W Co.12
- 4) 1850 A C LICal 2d,Bn wr.60?
- 5) 1850 A J AOCCA 19'75 24p.
- 6) 1850 A J Calif TAcRP wr64p NA545

These items are in chronological order (by year); then, in alphabetical order by the letters as they now appear. To conserve space and to further simplify, each year-group is headed by the respective year; and each column, within each year-group, is headed by the author's last initial. To avoid confusion with the title initials, the author's first initial is now changed from upper case to lower case. Now the information is in the final form:

1850
A
aBFM&S
192p,
EP.31
aTYIOr
(2dEd
It.10
cION-W
Co.12
cLICal
2d,Bn
wr.60?
jAOCCA
19'75
24p.
jCalif
TAcRP
wr64p
NA545

Note: The articles: A, An, and The are ignored. Titles of respect, such as: Miss, Mrs., Mr., Rev., Dr., Capt., and Judge are ignored. Middle initials are ignored. An even price indicates the average specialist dealer's price for a fine copy; an odd price indicates the average auction record. The question mark after the price indicates the price is prior to 1945; or is questionable for some other reason. (A price is not given unless it is deemed useful.)

QUESTIONS AND ANSWERS

Q. What books are covered by THE BOOKMAN'S BIBLE?

A. Books in English, or substantially in English, no matter where published, that would seem to have a commercial value of at least three dollars. Also, books that have less value but belong in one of the main fields of collecting, such as: Americana, Western Americana, Californiana, American First Editions, English First Editions, Art, Orientalia, Antiques, Arms and Armor, Medicine, Science, Science Fiction, Costume, Genealogy, etc. In this first published section only the items having a title page dated one of the years between 1850 and 1899 are included; and, only the ones giving credit to the author, editor, compiler, or translator (illustrator when the item is primarily his work; publisher when the item is obviously his).

Q. From what sources did you compile the book?

A. Book dealers' catalogs, my own experience, and the following authorities:

AMERICAN BOOK-PRICES CURRENT. 1896-1955.
TRADE PRICES CURRENT OF AMERICAN FIRST EDITIONS. 1937-1941.
UNITED STATES CUMULATIVE BOOK AUCTION RECORDS. 1940-1951.
Adams: SIX-GUNS & SADDLE LEATHER. (1954)
Blanck: BIBLIOGRAPHY OF AMERICAN LITERATURE. V.I. 1955.
Blanck: Merle Johnson's AMERICAN FIRST EDITIONS. Fourth Edition. 1942. (Also the other three editions)
Bleiler: THE CHECKLIST OF FANTASTIC LITERATURE. 1948.
Blumann: CALIFORNIA LOCAL HISTORY. 1950.
Bolton: AMERICAN BOOK ILLUSTRATORS. 1938.
Bradford: BIBLIOGRAPHER'S MANUAL OF AMERICAN HISTORY. 1907.
Brussel: ANGLO-AMERICAN FIRST EDITIONS: EAST TO WEST. 1935.
Cowan: BIBLIOGRAPHY OF THE HISTORY OF CALIFORNIA. 1933.
Cutler: MODERN BRITISH AUTHORS. (1930).
Evans: A GUIDE TO RARE BOOKS. 1948.
Heard: BOOKMAN'S GUIDE TO AMERICANA. 1953.
Howes: U.S.-IANA. 1954.
Rader: SOUTH OF FORTY. 1947.
Sabin: DICTIONARY OF BOOKS RELATING TO AMERICA. 1868.
Schwartz: 1100 OBSCURE POINTS. (1931)
Smith: PACIFIC NORTHWEST AMERICANA. 3d Edition. 1950.
Wagner & Camp: THE PLAINS AND THE ROCKIES. 3d Edition. 1953.
Wemyss: THE GENERAL GUIDE TO RARE AMERICANA. New Enlarged Edition. 1950.

(Hundreds of other references are published that I hope to compile as I go along. Some of these I have referred to for the present work but only to a limited extent.)

Q. Are maps, broadsides, newspapers, magazines, or prints included?

A. Yes. These are included to a limited degree. I made no special attempt to cover these fields thoroughly.

Q. What about sets?

A. Sets are included but coverage is rather limited. Generally, a set is excluded if its value is less than two dollars per volume. Sets are entered under the title page date of the first volume. Sets of collected works are sometimes entered under Wks or CWks instead of the exact initials.

QUESTIONS AND ANSWERS

- Q. How will I look up a book that has no date on the title page?
- A. Books without a dated title page are confined to a separate section to be published later. DO NOT TRY TO LOCATE THEM IN THIS SECTION. Often you may use the copyright date as a guide and find the item but you very likely will be getting the value of the first edition when the item you have is a reprint of considerably less value.
- Q. How will I look up a book that has no date whatever?
- A. Books with neither publication date nor copyright date are confined to a separate section to be published later.
- Q. How will I look up an anonymous item?
- A. An anonymous item may sometimes be found if in its title there is the name of an actual person. In this case his initials are used. Generally speaking, however, I have confined anonymous books, yearbooks, directories, and the like to a separate section to be published later.
- Q. When two or more authors are given, under which, shall I look?
- A. The first given. If this should fail try the next. If there is an editor you might try him.
- Q. Would I look up a Twain item under Twain or Clemens?
- A. Under the name that appears on the title page. This applies to all items where a pseudonym is used. In this connection, sometimes an author like Bret Harte had some of his books published with his first name, or first initial: Francis Bret Harte; later dropping the first name or initial. I have not always been able to determine which way the credit reads and no doubt have made errors in alphabetical placement regarding the first initial. Allowances should be made for this.
- Q. What about a book that gives only the last name of the author?
- A. This category I have placed at the very beginning of the column headed by the initial of the last name. For example:
Corporal Pike:- P ; Dr. Quigley:- Q ; Mrs. Horn:- H .
 S&Ran IRIC& A&TNO
The underline mark indicates that neither the author's first name nor initial is given.
- Q. What if the item was issued without a title page?
- A. In this case the wrapper or cover title is substituted and the same procedure is followed just as though it were the title page. If there is neither title page nor cover title the caption title or running head is used but the item will be found in one of the sections to be published later.

QUESTIONS AND ANSWERS

Q. Why do some title abbreviations or initials stop abruptly?

A. Originally I intended to run only the first five initials of a title-- if it had that many or more. As an example: HISTORY OF ~~THE~~ STATE OF NEW YORK (ignoring the article THE) would become HOSON. Later I allowed a few more spaces in such cases. I corrected many of the early entries but some remain hanging. (The articles A, An, and The are always ignored.)

Q. What about collation?

A. It was not my intention to collate the entries. What collating I did was primarily to aid in identification. Often I have mentioned a map or maps in items that contain them but I have not always done so. The same applies to plates and the number of pages.

Q. What would account for a variation in the actual number of pages of a given item and the number given in THE BOOKMAN'S BIBLE?

A. Most often this occurs when there is a page or more of print beyond the last numbered page. Some bibliographies give just the last numbered page while others make allowances for the pages following. It has been my policy to give the last numbered page plus an ampersand (&) to indicate additional pages of print. The additional pages may be ads, printer's imprint, appendix, addenda, errata, index, colophon, etc. I have not checked all entries, far from it, so many of the page numbers are given as they appear in the bibliographies. Quite often pamphlets of from 24 to 64 pages may vary. The variation can generally be accounted for by taking into consideration the possibility that the back printed wrapper was counted in the collation; or ignored, as the case may be. Less often this may indicate a different state or issue of the book.

It is possible when the number varies greatly that the two are entirely different items.

It is also possible that an error has been made and maybe it was mine.

When two or more different numbers of pages are given in this reference it indicates different states or issues exist and the prices given refer to the respective paginations.

Q. I have a book with a statement that it is limited to 550 copies.

Why do you give the number as 500 copies?

A. The statement may go further, mentioning something to the effect: of which 50 copies contain one page of the original manuscript. In cases such as this I have tried to break down the limited editions into their components so to speak. If 1226 copies were printed of which 1000 were numbered, 200 numbered and signed by the author and the illustrator, and 26 lettered and signed by the author and the illustrator and with a page of manuscript decorated by the illustrator, I would list the variations as: 1000c, 200c, and 26c, respectively. Not having examined a great many of the entries I was not always certain just how the statements are worded so one must use one's imagination when there is a variation.

Whenever a number is followed by a lower case c, 500c for example, it is to be read: One of 500 copies.

Whenever the abbreviation LtdEd is used it generally means that the number of copies to which the book is limited is not given in the book itself. If the number is given it is usually from 750 up. I have tried to give the actual number when there were fewer than 750 copies.

QUESTIONS AND ANSWERS

Q. Does the absence of the f imply the item is not a first?

A. No. I used the f to indicate first editions, first issues, first states, First bindings, first printings, first impressions, first published editions, etc., etc., but I did not use it in all cases. Many times I did not use it because the fact should be obvious from other information given. It should be assumed that the item is a first unless there is evidence to the contrary either in the item itself or in this reference. However, sometimes there is no evidence to the contrary, and the item may not be a first, but the price does apply to it no matter what edition it actually is, provided, of course, the date is correct and printed on the title page.

Q. Why more than one abbreviation for the same word?

A. I used two-letter abbreviations when that was all the space convenient; longer abbreviations when space permitted it and at the same time lent to more clarity. For example: Denver became De when followed by a price in the teens: De.15; Den possibly when followed by a price like 25: Den25; Denv with figures less than 10: Denv8.

Q. What are the most frequently used abbreviations for places of publication?

A. With the exceptions of London and Boston which are Ln and Bn respectively, abbreviations for one-word places are formed by the capitalized initial letter followed by the next letter in lower case. When space permits there may be another letter or two in correct order and still in lower case. For example: Sacramento may be: Sa, Sac, or Sacr; Hartford: Ha, Har, or Hart.

Abbreviations for two-word places are formed by the capitalized initial letters. For example: New York: NY. St. Louis may be either: SL or StL.

Abbreviations for three-word places are formed by the capitalized initial letters. For example: Salt Lake City: SLC.

When space is insufficient it may be shortened to SL. The fact that SL is also the initials of St. Louis really does not affect the use of this reference because the item itself will determine the city for which the initials stand.

Sometimes longer abbreviations are used but they are simply extensions of the foregoing principles.

EXPLANATION OF SYMBOLS

": inch; inches
 #: number
 \$: dollars
 -: underline mark-- used to denote
 the absence of the first name
 or first initial of the auth-
 or, editor, etc.; also used to
 stress an important letter,
 symbol, word, or words.
 &: used in place of the word and in
 all cases; used after a price
 to indicate the price could be
 as much as two or three times
 that value; used after the
 last numbered page of an item
 to indicate an additional
 printed page or more.
 ': foot; feet
 (: used to indicate a possible or
 actual break in the sequence
 of words or initials; used
 also to indicate possible or
 actual absence of the paren-
 thetical material (for example:
 (re)ls means the item is a re-
 issue but there may not be a
 statement to this effect in
 the item itself).
): generally used with its partner
 (to enclose a date that does
 not appear on the title page
 of the item.
 *: used after the initials of a
 title to indicate involved
 point material which will be
 given in a section to be
 published later.

EXPLANATION OF SYMBOLS---CONTINUED

- : used in the usual sense to show hyphenated words; sometimes I dropped it; sometimes it may appear where in the original it doesn't; used to indicate there are more letters (they may be given in the next line or they may not depending on the circumstances); in: 2v-1, the - means in: two volumes in one volume; used twice for a dash.
- ?: after a price, indicates a price prior to 1945, or a price that is questionable for some reason; (I did not enter a price unless I judged it fairly useful, but the presence of the question mark should put you on guard-- the price may be either too high or too low.)
- after the title initials, a questionable correctness;
- before a place of publication or before the number of pages, questionable correctness.

MORE QUESTIONS AND ANSWERS

Q. How did you arrive at the price?

A. I averaged the prices asked by the foremost dealers in the respective fields. By this method prices are theoretically neither very high nor should they be very low. With respect to auction prices an average was maintained when more than one price was located. Since auction prices are tricky it is possible for some of them to be either very high or very low. So that one may be able to differentiate between dealer prices and auction prices I have used the even figures starting with 4 to signify dealer prices and the odd figures starting with 5 to signify auction prices. Since a reputable dealer's price is a more reliable guide to value, the even figures: 4,6,8,10,12,14,16,18,20,22,24...50...98...150...1000.... are more reliable than the odd figures: 5,7,9,11,13,15,17,19,21,23,25,27...51...99...151...1005....

Q. Well what about the 2's and the 3's?

A. I have used the figure 2 to earmark books that are worth less than three dollars on the ordinary market. They are either quite common or are not particularly desirable. A great many of these can be found on bargain tables at prices from ten cents to twenty-five cents, or on shelves at prices ranging from fifty cents to one dollar.

I have used the figure 3 to classify the books that are priced about three dollars in dealer's catalogs. I have also used it for books that bring about three dollars at auction. Therefore it is the least reliable of all figures used. You cannot be certain if the item is a slow dog that you may not be able to place or if it is really worth your three dollars and warrants pricing somewhere between five and ten dollars. However, I'd say that at least ninety per cent of these items are really worth no more than three or three-fifty.

(I did not use 1 because of possible confusion with the letter: l.)

Q. When you had a choice which did you use, dealer's price or auction record?

A. Reputable dealer's price unless the time element was adverse.

MORE QUESTIONS AND ANSWERS

Q. What about the time element? How old are the prices given?

A. The prices given are from the period 1945 to 1956 inclusive. Obviously some books have become of much greater value through these years. Some books worth \$50.00 in 1945 are worth \$100.00 or more in 1956; some have dropped considerably during this period; however, the great bulk has remained fairly stable. I have given prices that date before 1945 when I thought they would help, but in each case I placed a question mark immediately following the price. The question mark I also used in this place to indicate a price that may possibly be questionable for some other reason.

Q. How does condition enter into price?

A. Prices given are prices specialists in the respective fields place on FINE copies in their original bindings. A GOOD copy often brings far less than a FINE one. This is true especially of literary first editions; not nearly so of Americana. FAIR or POOR copies of literary first editions are often worthless. FAIR or POOR copies of Americana may still be worth twenty to thirty per cent of their worth in FINE copies. On very rare Americana the percentage may run higher.

Q. What is a FINE copy?

A. We'll start with an absolutely perfect copy of a book as it is received from the publisher. This copy would be termed: MINT or PRISTINE. It is brilliant; it requires some force to open it; unless the paper is very thin, it will have a tendency to snap back into closed position. If you were to throw away its jacket and allow its binding to dull ever so slightly, not enough to detect except by comparison with a brilliant copy, you would then have a VERY FINE copy. If you were to open it a few times in the prescribed manner for opening a new book, diminishing its tendency to snap back to closed position, you would then have a FINE copy. If you continued opening it until it would just as soon remain open, you would have a VERY GOOD copy. At the point where it would rather remain open it is a GOOD copy, but verges on being FAIR. When the signatures begin to loosen up the book is POOR.

The foregoing is all based on the assumption no other damage is incurred. Should one or both of the hinges become cracked an otherwise FINE copy becomes only GOOD or FAIR. Should slight soiling occur an otherwise FINE copy becomes only GOOD; a little more soiling: FAIR; bad soiling: POOR. Scratches or wear from rubbing against other books or other objects transform an otherwise FINE copy into one that is only GOOD or FAIR or POOR depending upon the extent of the damage. A little paint or fingernail polish, though they may be sanitary, would make a GOOD copy out of a FINE one. Writing, inside or out, would depreciate the book unless it was done by someone directly connected with its production, in which case the value may increase. Writing by a person of prominence or importance may increase value. A tear in the binding automatically relegates an otherwise FINE copy to the status of GOOD; or, worse if it is a bad one. A tear in a leaf whether end-paper or text down-grades from FINE to GOOD; a tear that effects the text may drop it to FAIR; a tear that results in absence of printed material would, in most cases, drop the item out of consideration entirely.

What has been stated above applies mainly to books produced during the twentieth century and applies to books which were manufactured of good materials. Some allowances are made in cases of older books and books made of inferior materials. By this is meant that a book of good physical material printed

MORE QUESTIONS AND ANSWERS

Q. What is a FINE copy? (continued)
in 1910 and classed VERY GOOD by the standards above would be classed FINE had it been printed in 1884. Similarly, a book on cheap paper, or in a cheap binding, or both, would be up-graded.

Q. Can I expect to get the prices indicated?

A. Since the odd prices from 5 up are derived from the auction records your chances must be analysed on that basis. The even prices from 4 up are derived from specialist dealer prices. If an item is Californiana and you are a specialist in this field and in a location of great demand for this type of material, or have a mail order business that reaches the ideal market for Californiana, then you can expect to get somewhere near the prices indicated. If you are not a specialist in this field, or if you have not the ideal market, you very likely may not readily get these prices. The same principle applies to the other fields of collecting.

Prices brought at auction vary, in the over-all picture, from the price a specialist dealer is willing to pay for an item in his respective field up to the price the item is likely to bring at retail. I believe the odds would be in your favor if you would assume the retail value of a given item to be half again to twice the auction price.

Q. How will I know to which of the many original bindings the price refers?

A. It was quite common during the years covered by this reference to issue a book in many different types of binding. When I have not noted the type of binding it is to be assumed the binding is either cloth or boards. If you have an item in original wrappers, or leather of some type, and I have made no reference to binding type, it will be necessary for you to determine whether or not price will be affected. Often a copy in original wrappers is worth more than one in original cloth or boards. In the same connection, sometimes a leather binding is worth more.

Q. How about advance copies, presentation copies, trial bindings, special bindings, association copies, etc.?

A. Values given refer only to FINE copies of any given item as it was issued without any additional feature that would enhance its value. If both a trade and a limited edition were issued I have given (when possible) the value of each separately. If the trade edition was issued unsigned the value applies to the item unsigned. A FINE copy of the trade edition signed would be theoretically of more value than one unsigned. The limited edition may have as a feature the signature of the author. This does not constitute a feature to enhance it above any other FINE copy of the limited edition because theoretically they were issued thus. Of course a copy lacking the signature would theoretically be less valuable.

Occasionally I have entered such exceptions as advance copies, presentation copies, trial bindings, proofs, etc., but in each case I have noted them. An advance copy: (advC; a presentation copy: (presC; trial issue: (trial; proof: (proof.

MORE QUESTIONS AND ANSWERS

Q. Why are some items unpriced?

A. An item may be unpriced for any one or more of the following reasons:

1. I did not locate a price and I was not able to price it intelligently.
2. In the process of compiling I overlooked or lost the price.
3. The entry may be mythical (a ghost).
4. The entry may be misplaced.
5. The entry may be entered under the editor and also under the author; possibly priced under one and not the other.
6. The entry may have the initials of the title incorrect.
7. The entry may be a very common item unworthy of either an auction record or space in a dealer's catalog.
8. The entry may be excessively rare and any price may be far from true value if such a value could be established.
9. The entry may be from the cover-title in place of the title page title; possibly priced under one and not the other.
10. Sometimes, due to the arrangement of the title page, the sub-title is used; possibly the item is priced under one and not the other.

(In defense of myself: Many unpriced items I could have competently priced, as could any experienced dealer, had I taken the time during compilation or after its completion, but that would have meant another year or so. Most of these items will be priced in the natural course of revising for the Second Edition....five to ten years from now.)

Q. Why do you sometimes have two prices on the same item?

A. Sometimes I had only two prices by which to judge. When they varied greatly I entered both.

Q. What about dates in Roman numerals?

A. Dates in Roman numerals are sometimes confusing. The following may be helpful:

1000	&	500	&	100	&	50	&	10	&	5	&	1	equals	1666
M		D		C		L		X		V		I	equals	1666

Complications arise when 4s and 9s come into the picture. The 4 is one I preceding one V; or: IV; meaning one less than five. The 9 is one I preceding one X; or: IX; meaning one less than ten. Dates in the twentieth century usually incorporate a C preceding an M so that 1900 becomes MCM.

There are variations in dating by Roman numerals but the most common form is listed below:

MDCCCL.....1850	MDCCCLVI.....1856	MDCCCLXII....1862
MDCCCLI.....1851	MDCCCLVII....1857	MDCCCLXIII...1863
MDCCCLII.....1852	MDCCCLVIII...1858	MDCCCLXIV....1864
MDCCCLIII....1853	MDCCCLIX.....1859	MDCCCLXV.....1865
MDCCCLIV.....1854	MDCCCLX.....1860	MDCCCLXVI....1866
MDCCCLV.....1855	MDCCCLXI.....1861	MDCCCLXVII...1867

MORE DATES IN ROMAN NUMERALS

MDCCCLXVIII....1868	MDCCCLXXVIII...1878	MDCCCLXXXVIII...1888
MDCCCLXIX.....1869	MDCCCLXXIX.....1879	MDCCCLXXXIX.....1889
MDCCCLXX.....1870	MDCCCLXXX.....1880	MDCCCXC.....1890
MDCCCLXXI.....1871	MDCCCLXXXI.....1881	MDCCCXCI.....1891
MDCCCLXXII....1872	MDCCCLXXXII...1882	MDCCCXCII.....1892
MDCCCLXXIII...1873	MDCCCLXXXIII...1883	MDCCCXCIII.....1893
MDCCCLXXIV....1874	MDCCCLXXXIV...1884	MDCCCXCIV.....1894
MDCCCLXXV.....1875	MDCCCLXXXV....1885	MDCCCXCV.....1895
MDCCCLXXVI....1876	MDCCCLXXXVI...1886	MDCCCXCVI.....1896
MDCCCLXXVII...1877	MDCCCLXXXVII..1887	MDCCCXCVII.....1897
MDCCCXCVIII....1898	MDCCCXCIX.....1899	

Q. Do you have a few tips?

A. Yes. My first one is: be positive you understand all symbols and details given under an item in question before going off the deep end. Second: ignore price, or points, or both, in cases where you have better information; for, after all, the book isn't infallible, damn it!
